

## Idea – Adventures of a Misshapen Gumball

The animation is about a group of gumballs in a gumball machine. One of the gumballs is oddly shaped, and a little larger than the others. Because of this, the odd gumball is a bit of an outcast and struggles to fit in with the other gumballs. When someone approaches, and one of the gumballs is retrieved from the machine (and eaten), the gumballs become scared. The special gumball is now at the bottom of the machine. When another person approaches the machine in order to get a gumball, it is realised that the special gumball is too big to slide through the machines exit point—saving the rest of the gumballs and itself from being taken from the machine. The gumballs crown this special gumball as their saviour.
